Thanks for your yours It is my attempt to use the character sheet with all fields that make the proper mathematics for the generation of characters. I also added some new pages our game group is using. Now there is a background with a supplementary information page and a photo album page. I'm planning on adding Netrunner's page, but I haven't arrived yet. I have done all the math necessary for an easy generation of characters using the values of the starting point in the basic regulation. I would like any feedback on errors or errors found, please. I'm not sure how to include a .pdf form in the forum, so I made a shared link to my Google drive. Let me know if it works or not. All games. Nieschaydes you are reading a free preview Page 2 is not shown in this preview. Here, Cyberpunk fans, because now we have a sheet of Cyberpunk red characters, and it is completely integrated with our campaign manager! So fasten the safety belts to the neon and let's take a look! How does the character sheet work? Set up a sheet of Cyberpunk red characters is really easy! Follow these steps: create a new character and choose "Cyberpunk Red" as a role-playing system. After redirecting to the character profile, click the sheet tab and click the Choose Sheet button. Use the drop-down menu to select "Cyberpunk Red" again and click the button. Fill the sheet! Do not forget to click the Save Changes button at the bottom of the page. And this is it! Here's how a complete sheet appears: it's so red! And full of buttons to click! You will notice that in the screenshot there are several numbers within dark squares. These are all clickable buttons! Just click on them to launch virtual dice and the result for that skill shot.
